RELEVANT EXPERIENCE

Liability Claims Adjuster **Allstate**

2019 – present
Chandler, AZ

Investigate single and multi-vehicle auto accidents using innovative tools and technology to capture recorded statements, photos and/or the review of police reports to resolve losses. Communicate with customers and claimants to gather data, review evidence and discuss final liability decisions. Negotiate claim settlements with customers in accordance with business unit standard methodologies.

Short Term Disability Claims Examiner **Prudential**

2019– 2019
Scottsdale, AZ

Conducted investigations to determine whether or not to accept liability and to what degree. Approved or denied benefits accordingly. Communicated with claimants, employers, and various medical professionals to gather information regarding the application for, payment of, and ongoing management of benefits. Responded to various written and telephone inquiries including eligibility, approval/denial determinations, status and continuation or closure of benefits.

ADDITIONAL EXPERIENCE

Operations Specialist II **Edward Jones**

2015– 2017
Chandler, AZ

Broker's Assistant **Main Street Renewal**

2013 - 2015
Chandler, AZ

ACHIEVEMENTS

Director of Operations (Volunteer) **Institute of Science and Technology**

2012 - 2013 **Youth**
Ashanti Region, Ghana

- Financially restructured the organization; operated a full year without any loans for the first time in its history. Effectively made the organization financially self-sustainable by closely monitoring, recording, reducing expenses and increasing revenues. Developed a debt repayment plan for the organization and established an organizational budget.
- Oversaw and actively participated in opening the program's first computer lab - debt-free. Negotiated workmanship, materials for security set up, port clearance and transportation of 60 computers. Electrically set up the lab for fans, voltage regulator and additional computers in the future.

- Successfully taught one year of computer skills- students by the end of the course were able to write basic articles using Microsoft Word, make PowerPoint presentations with effects, tables, and charts. Also, they were able to create spreadsheets using Microsoft Excel using formulas and data calculations and produce pivot tables, charts, and graphs.

PROJECTS

Password Generator | GitHub: <https://github.com/azu20/Password-Generator> | Deployed: <https://azu20.github.io/Password-Generator/>

- This application generates a random password based on user-selected criteria.
- This project reflects the application to identify and declare variables containing primitive and object data types in JavaScript, write for loops to iterate over strings and arrays, write conditional statements using if/else and switch.
- **Tools / languages used:** CSS, HTML, JavaScript (objects)

Code Quiz | GitHub: <https://github.com/azu20/Coding-Quiz> | Deployed: <https://azu20.github.io/Coding-Quiz/>

- This page is a brief web development timed quiz with multiple-choice questions.
- I incorporated the application of timers, Document Object Model (DOM), getting, selecting, traversing, and manipulating elements, form events, bubbling and propagation, and event delegation. Researched Web API documentation to implement new and unfamiliar interfaces.
- **Tools / languages used:** CSS, HTML, JavaScript, DOM API,

Day Planner | GitHub: <https://github.com/azu20/Work-Day-Scheduler> | Deployed: <https://azu20.github.io/Work-Day-Scheduler/>

- This simple calendar application allows the user to save events for each hour of the day.
- I applied the following concepts: incorporate jQuery into HTML documents via CDN and use its associated selector. Perform DOM traversals to get and select elements by tag, class, and id as well as node relationship.
- **Tools / languages used:** CSS, HTML, jQuery
